# RENUVA POST CARE INSTRUCTIONS

**Risks**

There are certain and inherent risks and potential side effects with any invasive procedure. These include but are not limited to:

1) Post-treatment swelling, redness, discomfort, and bruising.
2) Initial swelling may persist for up to 2-4weeks.
3) Small nodules/bumps may be felt when massaging skin. These bumps may last 4-6weeks.
4) Scarring.
5) Allergic Reaction.
6) Post-Treatment Infection.
7) Injection into blood vessels resulting in tissue necrosis.
8) Further therapy may be required.
9) The use of anti-inflammatory drugs and/or anticlotting agents may result in increased bleeding or bruising at the injection site(s). If any severe reactions should occur after treatment with Renuva®, you should immediately contact your physician.

## Post-Treatment

Apply a cool compress to the injection site for up to 48hrs. Avoid applying pressure to the treated area for 24 hours post-treatment. Massage the treated area for 5 minutes twice a day for 4 weeks after the injection.
